EDUCATION

Pittsburgh Technical College
Robinson, PA • 05/2017

Assoc. in Computer Science

Looking to create Web3 Technologies or Video Games to bring the world together.

Top Projects

OP Atlas - Developed the application process for Optimism's RetroPGF Missions: Dev Tooling & Onchain Builders.

Rep & Roles Starter Kit – Secured $60k grant to build a Starter Kit for implementing reputation tokens and granting of roles within organizations

Engagement.Vision - Generates a user engagement score for communities through a variety of data sources.

Pizza People – NFT collection generating $26k in profits. Advertised within the Coinbase Wallet app.

Trash NFTs - One of first ERC404 memecoins. Achieved a $1.8m peak market cap.

Employment History

Project Venkman - Blockchain Integrations Engineer
Austin, TX • 01/2022 - 01/2023
- Deployed NFTs generating $180k+ revenue and attracting positive media.

Brandgage – Interactive Applications Developer
Pittsburgh, PA • 05/2017 - 10/2018
- Developed interactive Virtual Reality and Augmented Reality applications for pharmaceutical conferences to increase exposure and engage attendees.

Other Initiatives

Coinbase
- Bootcamp Mentor guiding a student through weekly sessions of smart contract feedback and review.

Optimism – Tech Support Specialist and Node Operator (TechNERD)
- Supported developers and solved their problems related to Blockchain Node Operations in a timely manner.

Raid Guild
- Participated as a member of Cohort VII. Collaborated and brainstormed with other members. Built a web application that encapsulated the cohort's achievements during the end of orientation.

Filecoin
- Speaker at Filecoin Network Base about Bridging Web2 Gaming into Web3.

ATX DAO
- **Membership Portal** – home for ATX DAO's tools and the necessary info needed to get involved with events, projects, and governance.

Unity Tooling
- Providing tools to improve development workflows of the Unity Engine ranging from Raycast Controllers, Vector2s, Overlap shares and more.

Game Development
- Created a multitude of games exploring narrative, role-playing, leveling systems, dungeons, customization, and arcade-like features. Released 3 complete games on iOS/Android with Unity Ads integration and patches with bugfixes.
